Token Economics

The company has minted 150,000,000 Greenheart CBD Tokens

The initial token is an ERC -20 token. Bridges to other protocols may be added at a later date

The tokens will be vested for investors on the following schedule:

- 1. Private Sale tokens will be vested 25% monthly over a 4 month period
- 2. Public Sale Tokens will be vested 12.5% weekly over an 8 week period

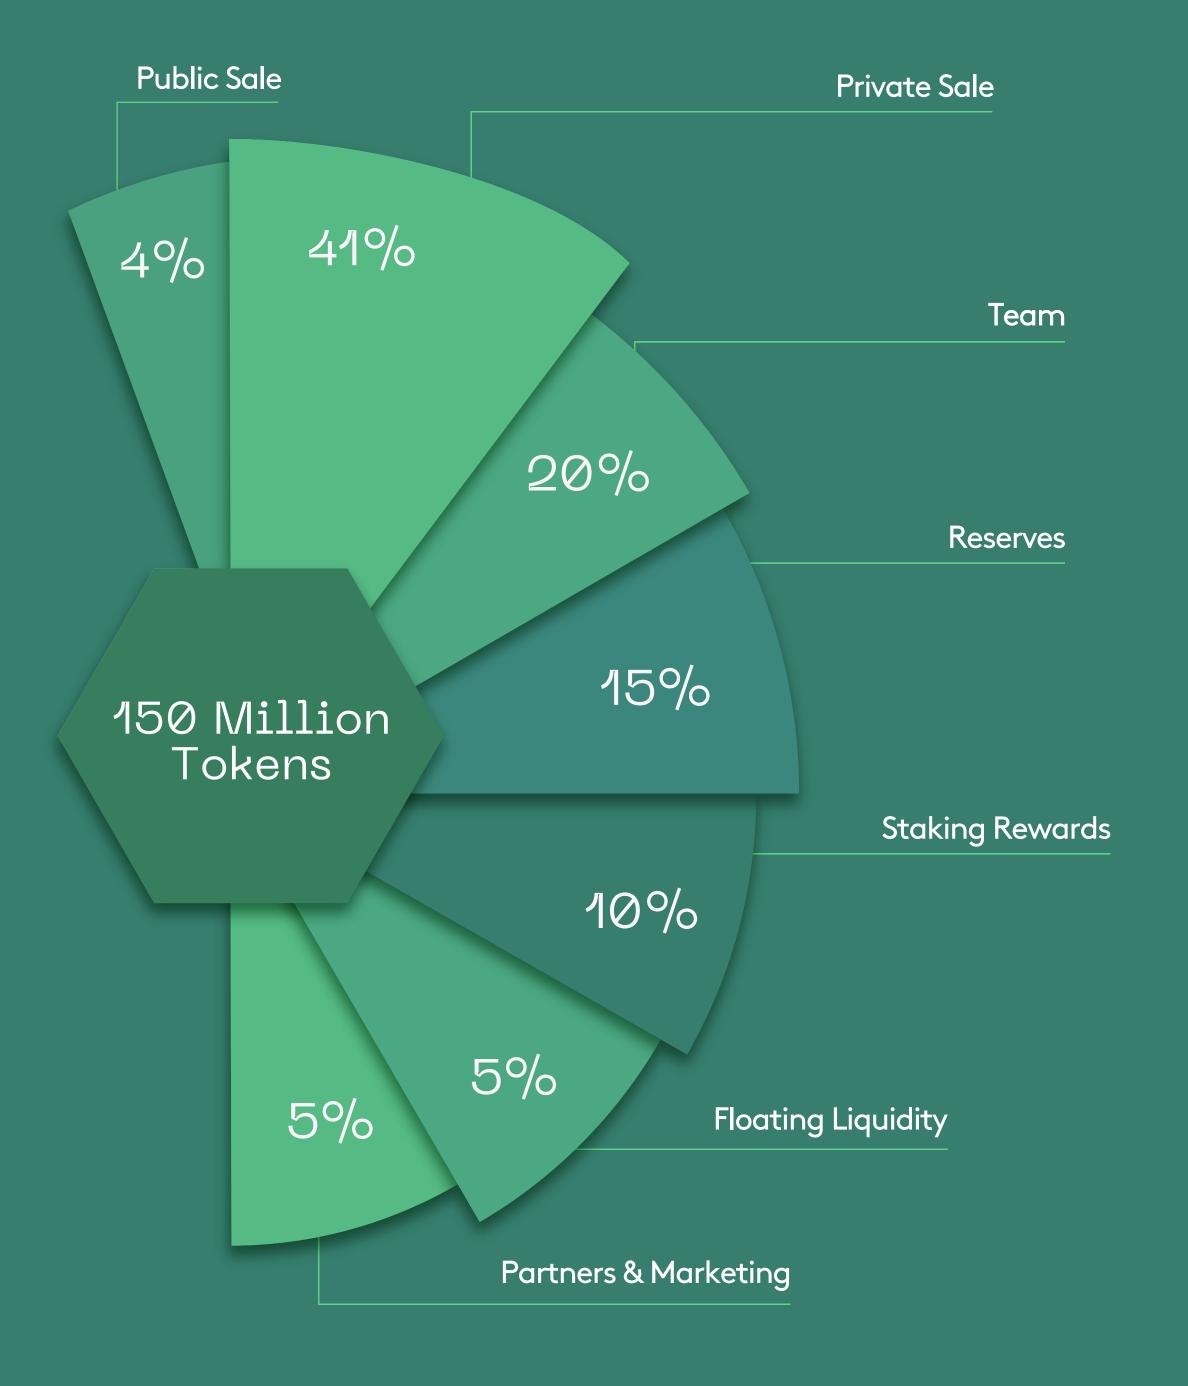

Tokens allocated to advisors, team members and ecosystem partners vested over a 12 month period

1 CBD
= \$0.40

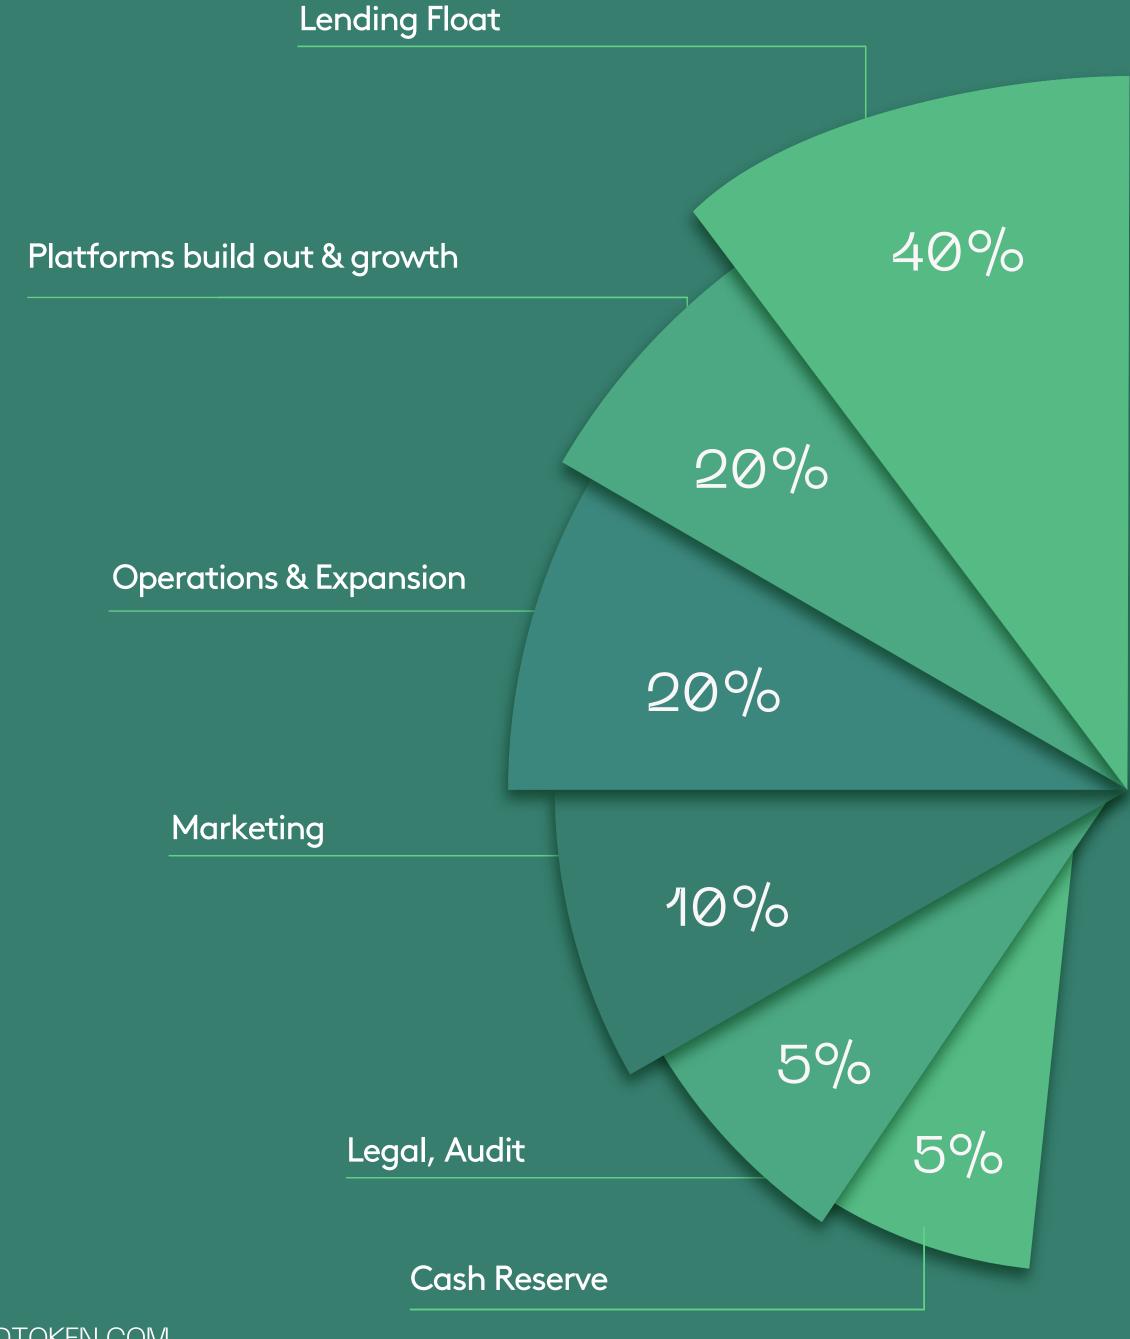

Token Allocation

- 4% Public Sale 6,000,000
- 41% Private Sale 62,000,000
- 20% Team 30,000,000
- 15% Reserves 22,500,000
- 10% Staking Rewards 15,000,000
- 5% Floating Liquidity 7,500,000
- 5% Partners & Marketing 7,500,000

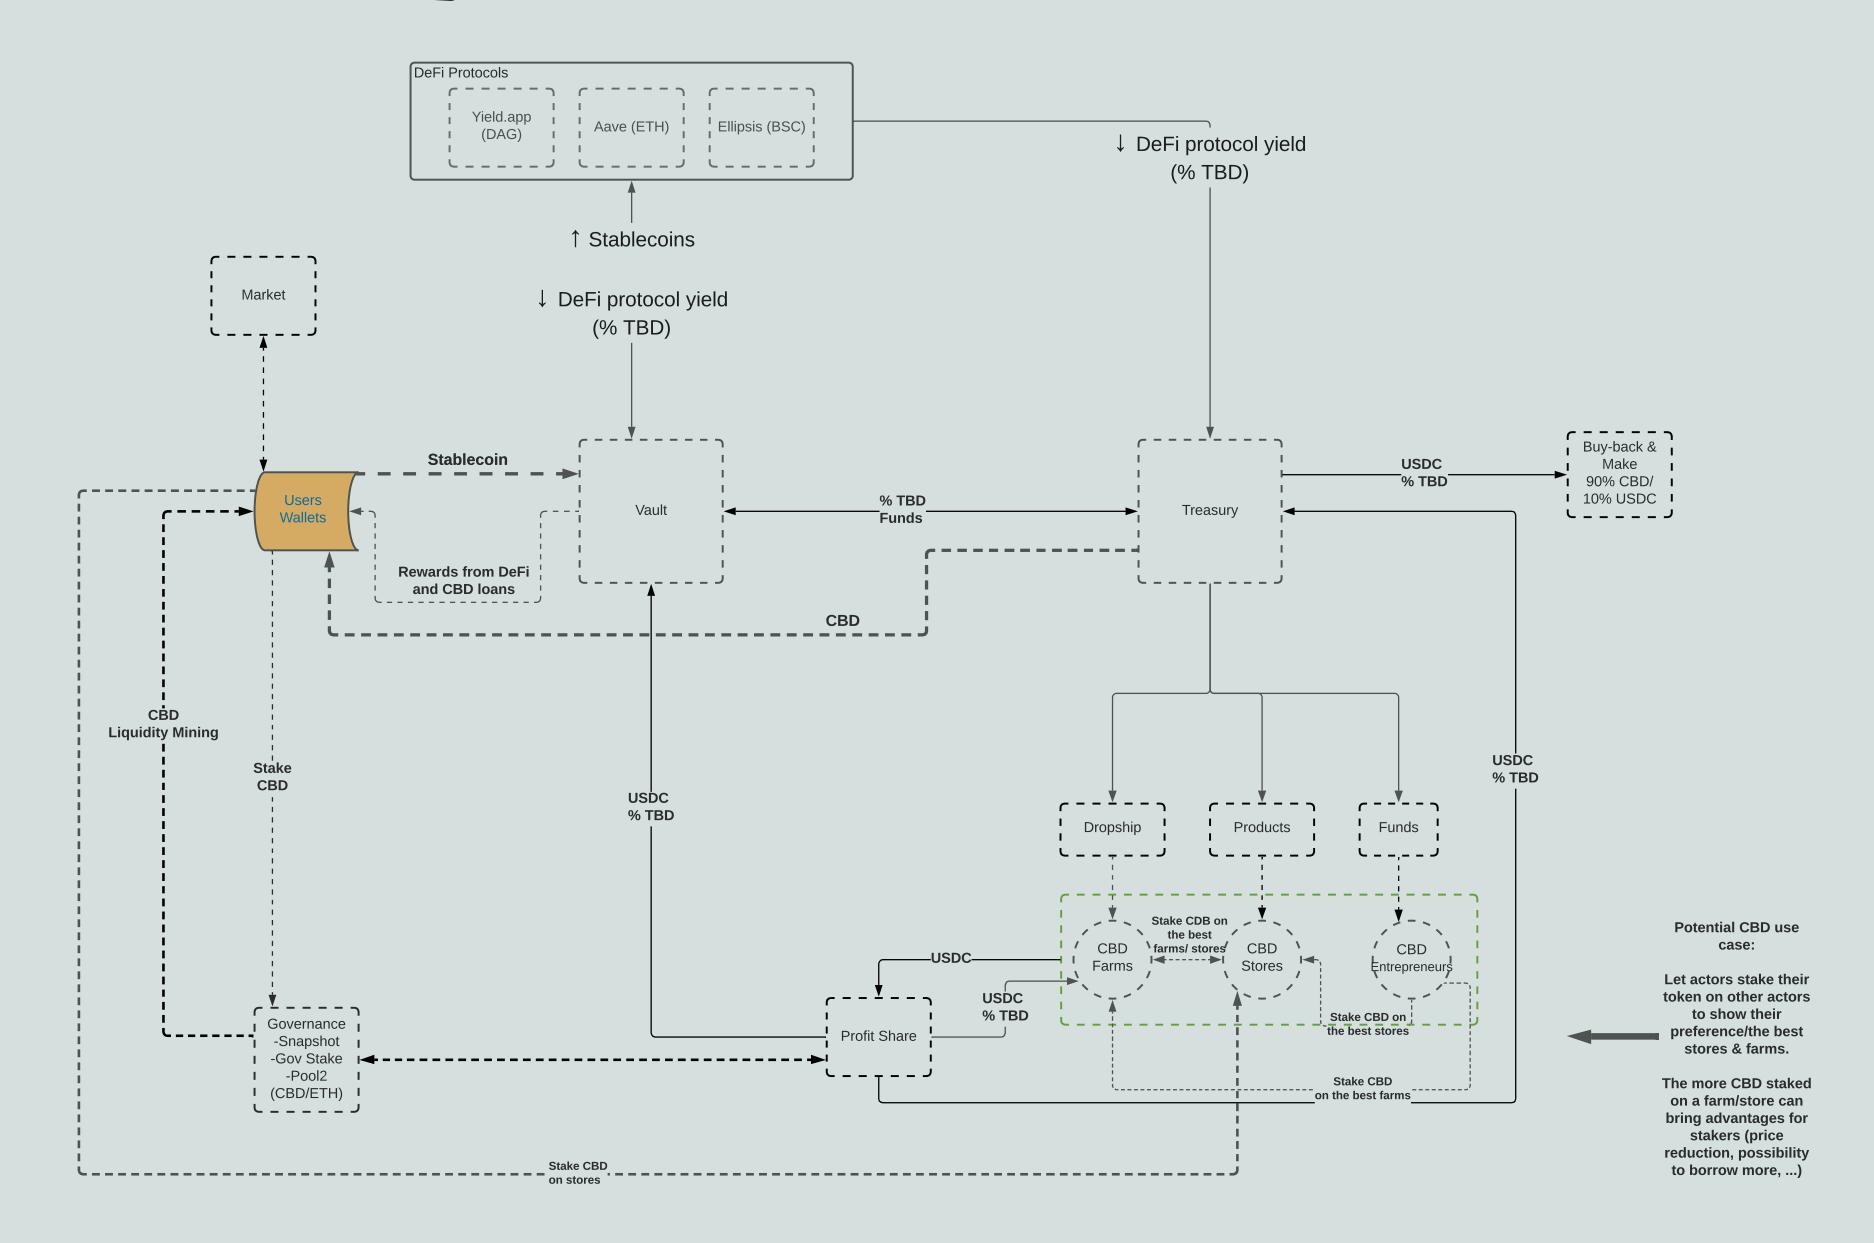

Use Of Funds

- 40% Lending Float
- 20% Platforms build out & growth
- 20% Operations & Expansion
- 10% Marketing
- 5% Cash Reserve
- 5% Legal, Audit

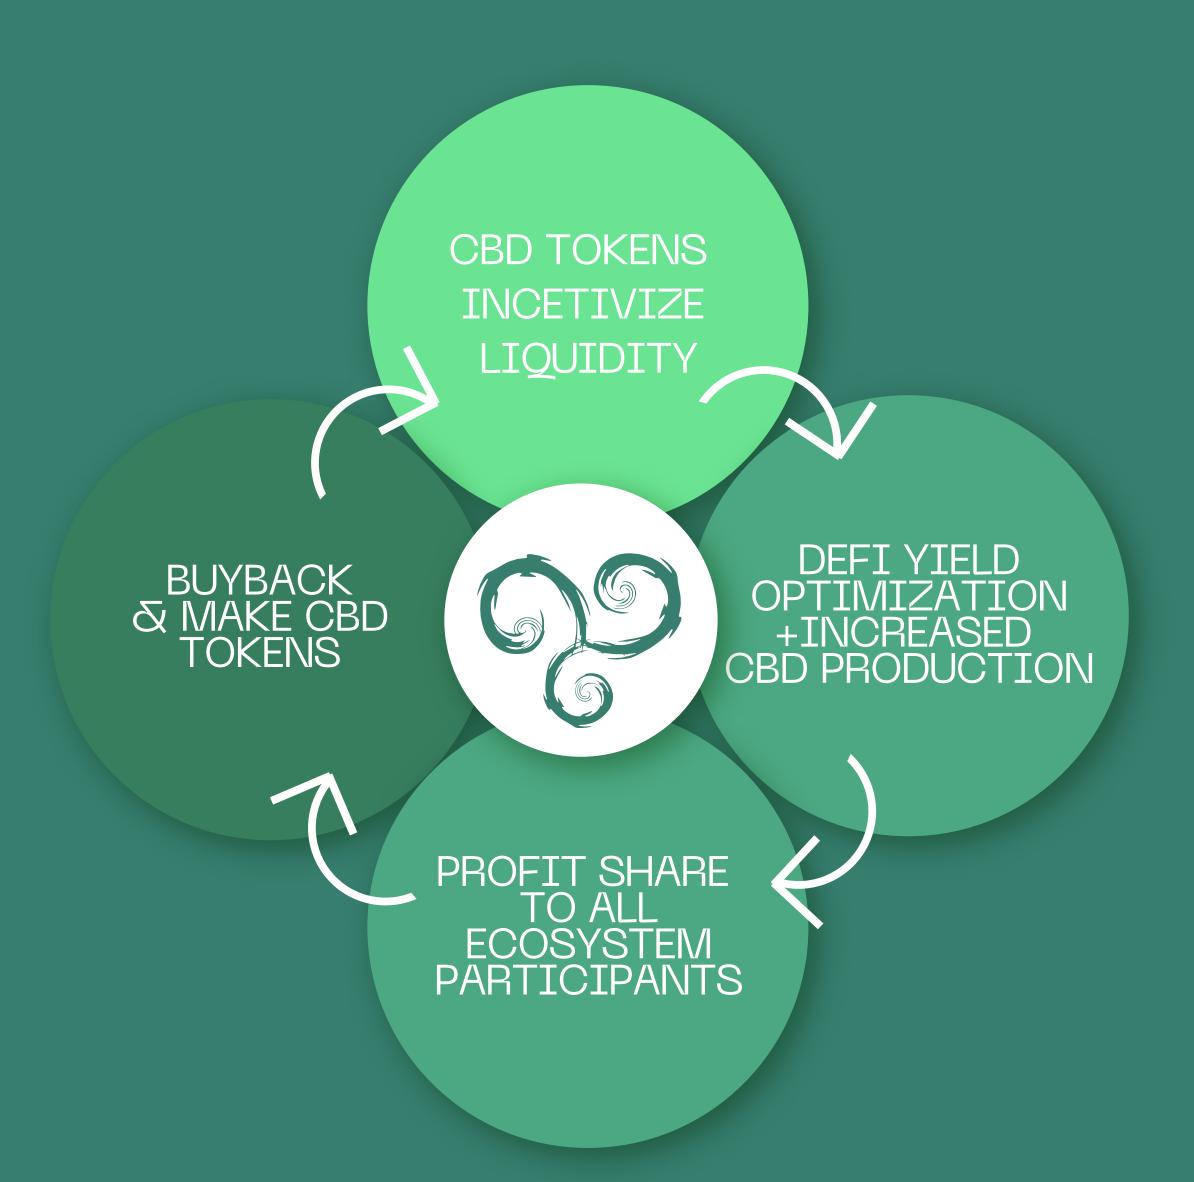

CBD Ecosystem Circular Token Economy

CBDeFi Flywheel

Typical Loan to Farmers

Typical loan to farmer: - \$500 - \$50,000 USD Typical Duration 1 - 5 Years Typical Interest Rate - 5% interest

A farmer's income in the developing world: -

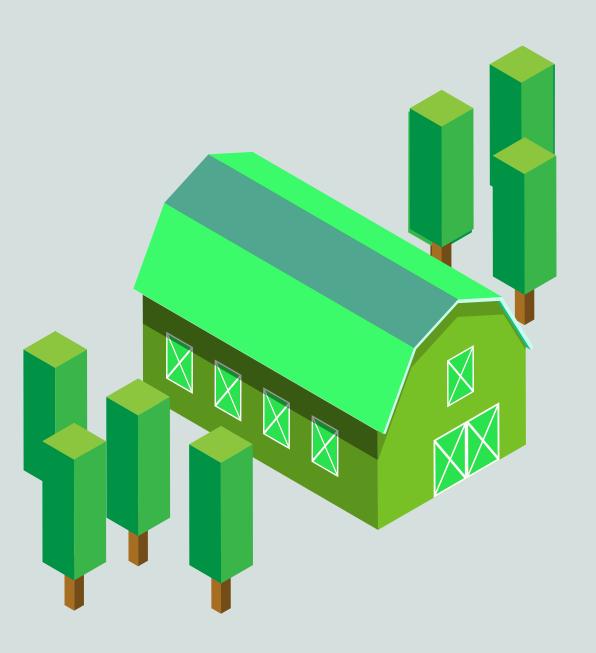

Existing Cash Crop farming - \$1,500 per annum Return from an acre of CBD cultivation - \$2,500 per crop cycle

A typical farmer's income from growing CBD Value of crop per acre - \$2,500 A typical acre of production would cultivate 200kg of dried flower @ 5% CBD Using Al and Drone technology will increase production levels

Total Farmer Income per acre - \$2,500 per crop cycle

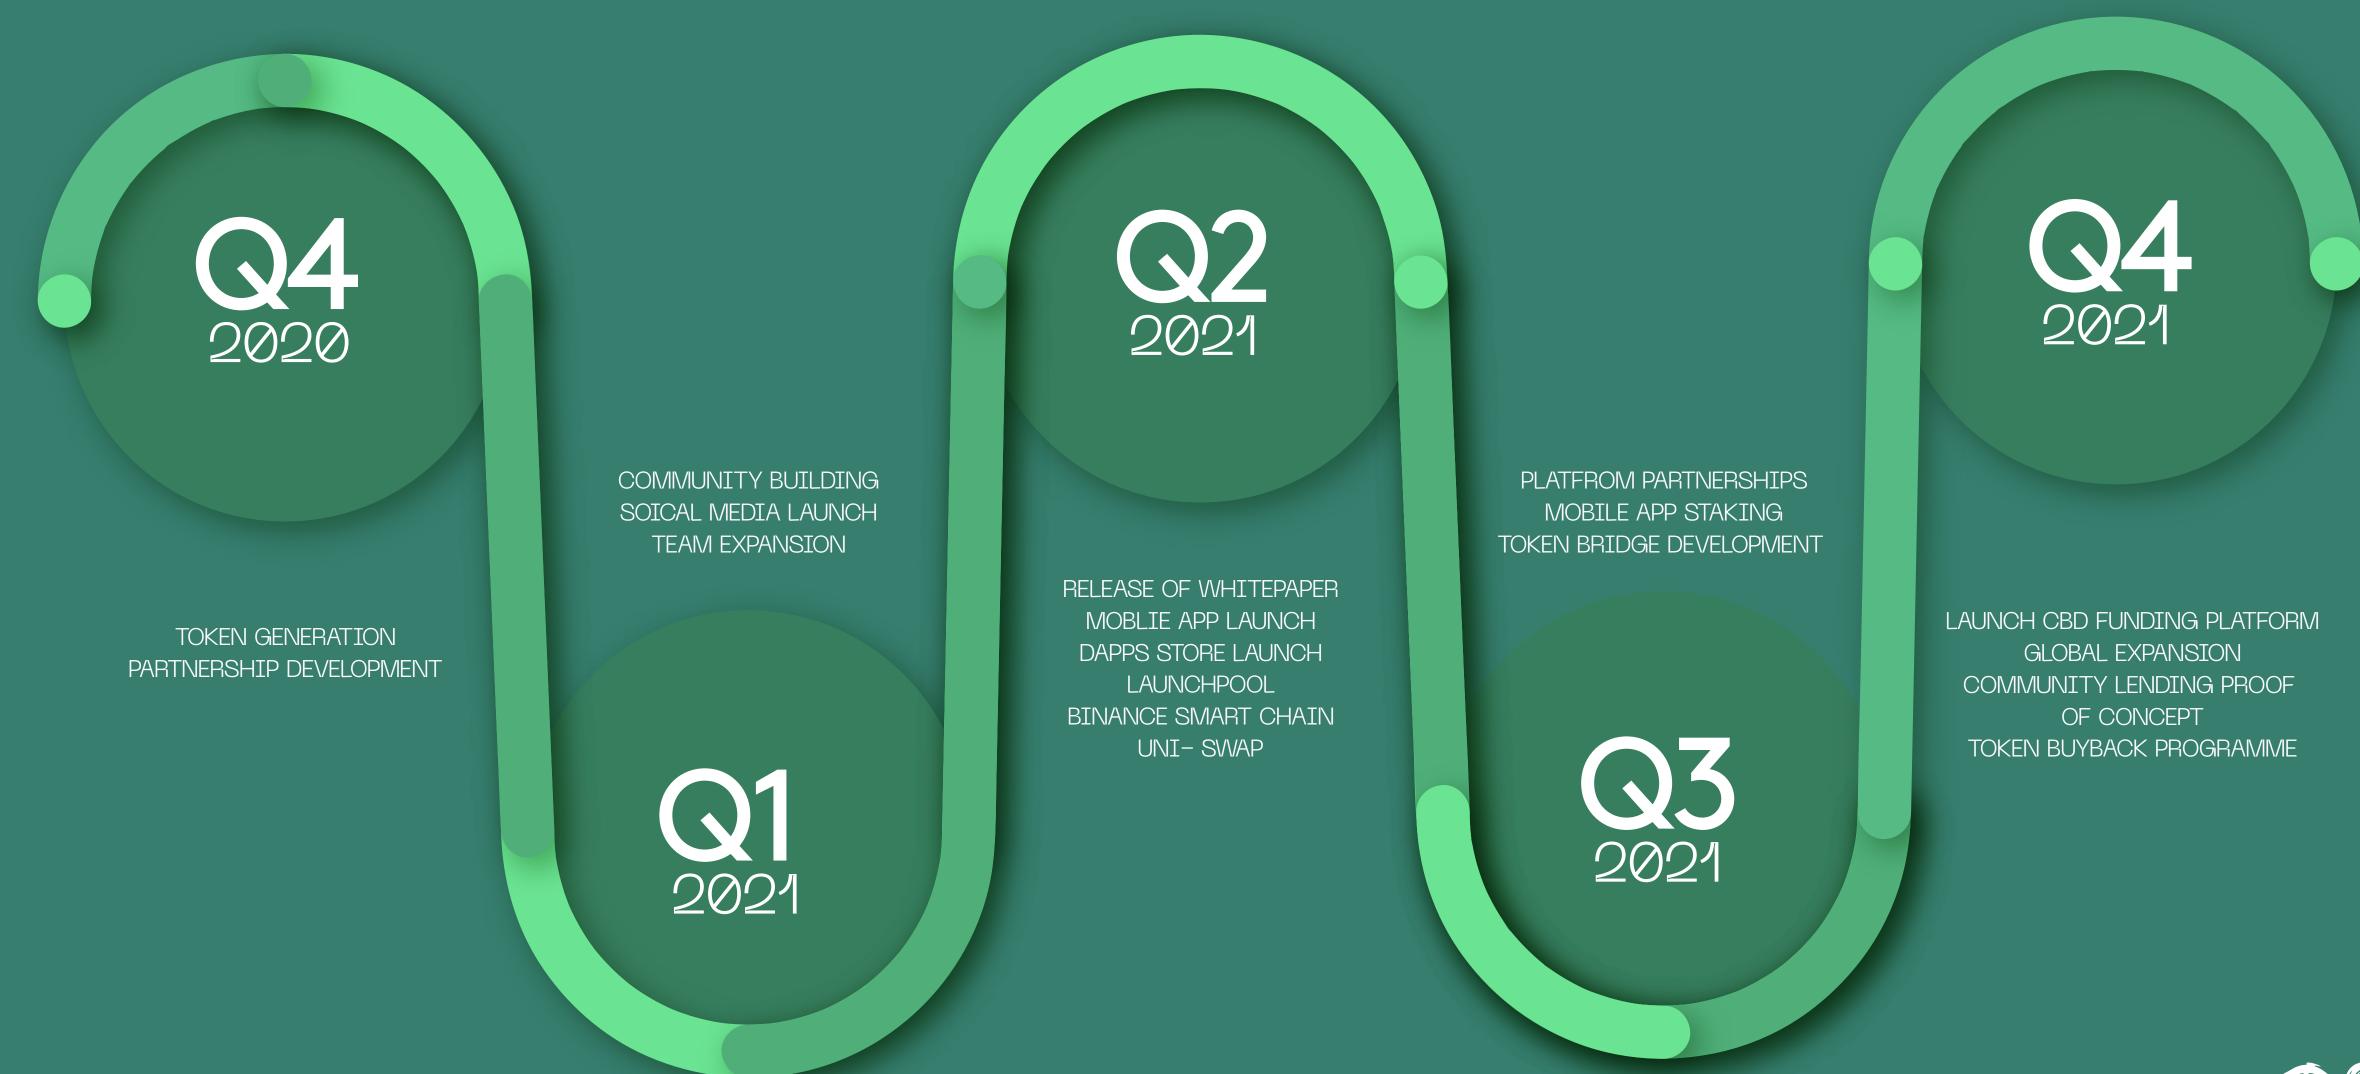

*Assumption - Farmer growth financial model based on 80% of Greenheart CBD's typical production return

A planned profit share (estimated 20%+) of consumer sales will also be implemented for qualifying CBD producer
